Start (board)
Create a list of possible moves
Check every spot on the board to see if its legal
If move is legal
Yes
Add it to the list of possible moves, continue to the next one
No
Disregard it, continue to the next one
For every possible move. Create a counter for total amount of flipped counters
Text
For every direction in move
if you meet rival counter
No
Continue onto the next direction
yes
Continue in the same direction and this one to the flipped counters
While there are rival counters in the same direction
Yes
Continue and add them to flipped counters count
No
Is the counter an allied counter or "none"
allied
move is legal keep the counters in flipped counters count
none
Cannot flip the counters so take them away from the flipped counters count
if all directions are checked
No
move onto the next directions repeat the steps from if meet rival counter
yes
Compare how many counters are flipped by this move and how many counters are flipped by the current best move
If the current move flips more than the best
No
Disregard current move keep the best move the same
Yes
Make the current move the best one
Move onto the next move. Repeat steps from check every direction
if all moves checked
No
Yes
End. Return best move
